

# Inclusive and Sustainable Design

is Both Timeless and Timely

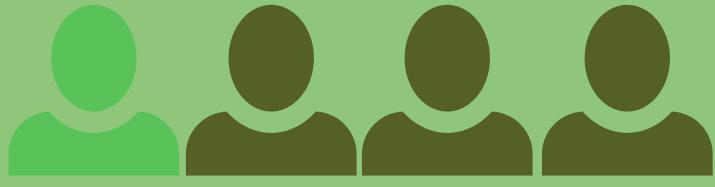

## Sustainability Isn't New, It's Rediscovered

70% of today's sustainable design principles have roots in ancient architecture

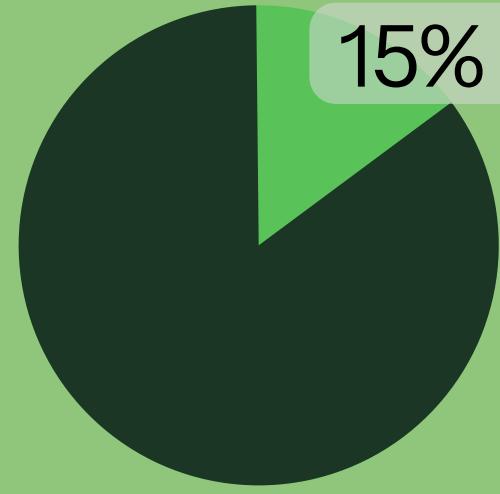

## Accessible Design Needs

1.3 BILLION

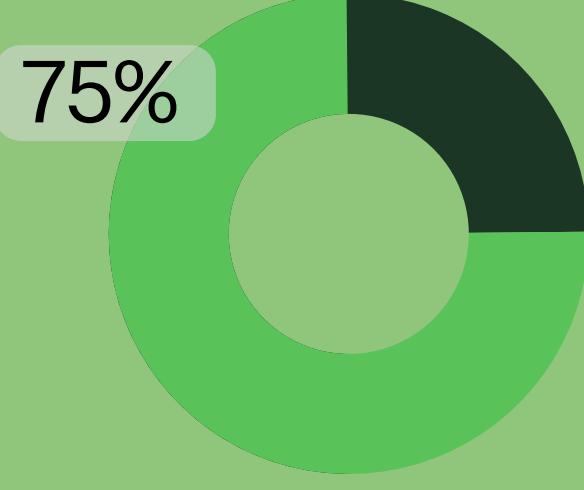

Globally 1.3 billion people, including 1 in 4 U.S. adults could benefit from accessible design

## Disability Representation

According to the United Nations, over 1 billion people globally have some disabilities, representing about 15 % of the global population

## Accessibility Becomes a Design Standard

Around 75% of design projects in 2022 considered accessibility a core requirement

**“I don’t need easy, I just need possible”**

- Bethany Hamilton
