## WHERE YOU STAND

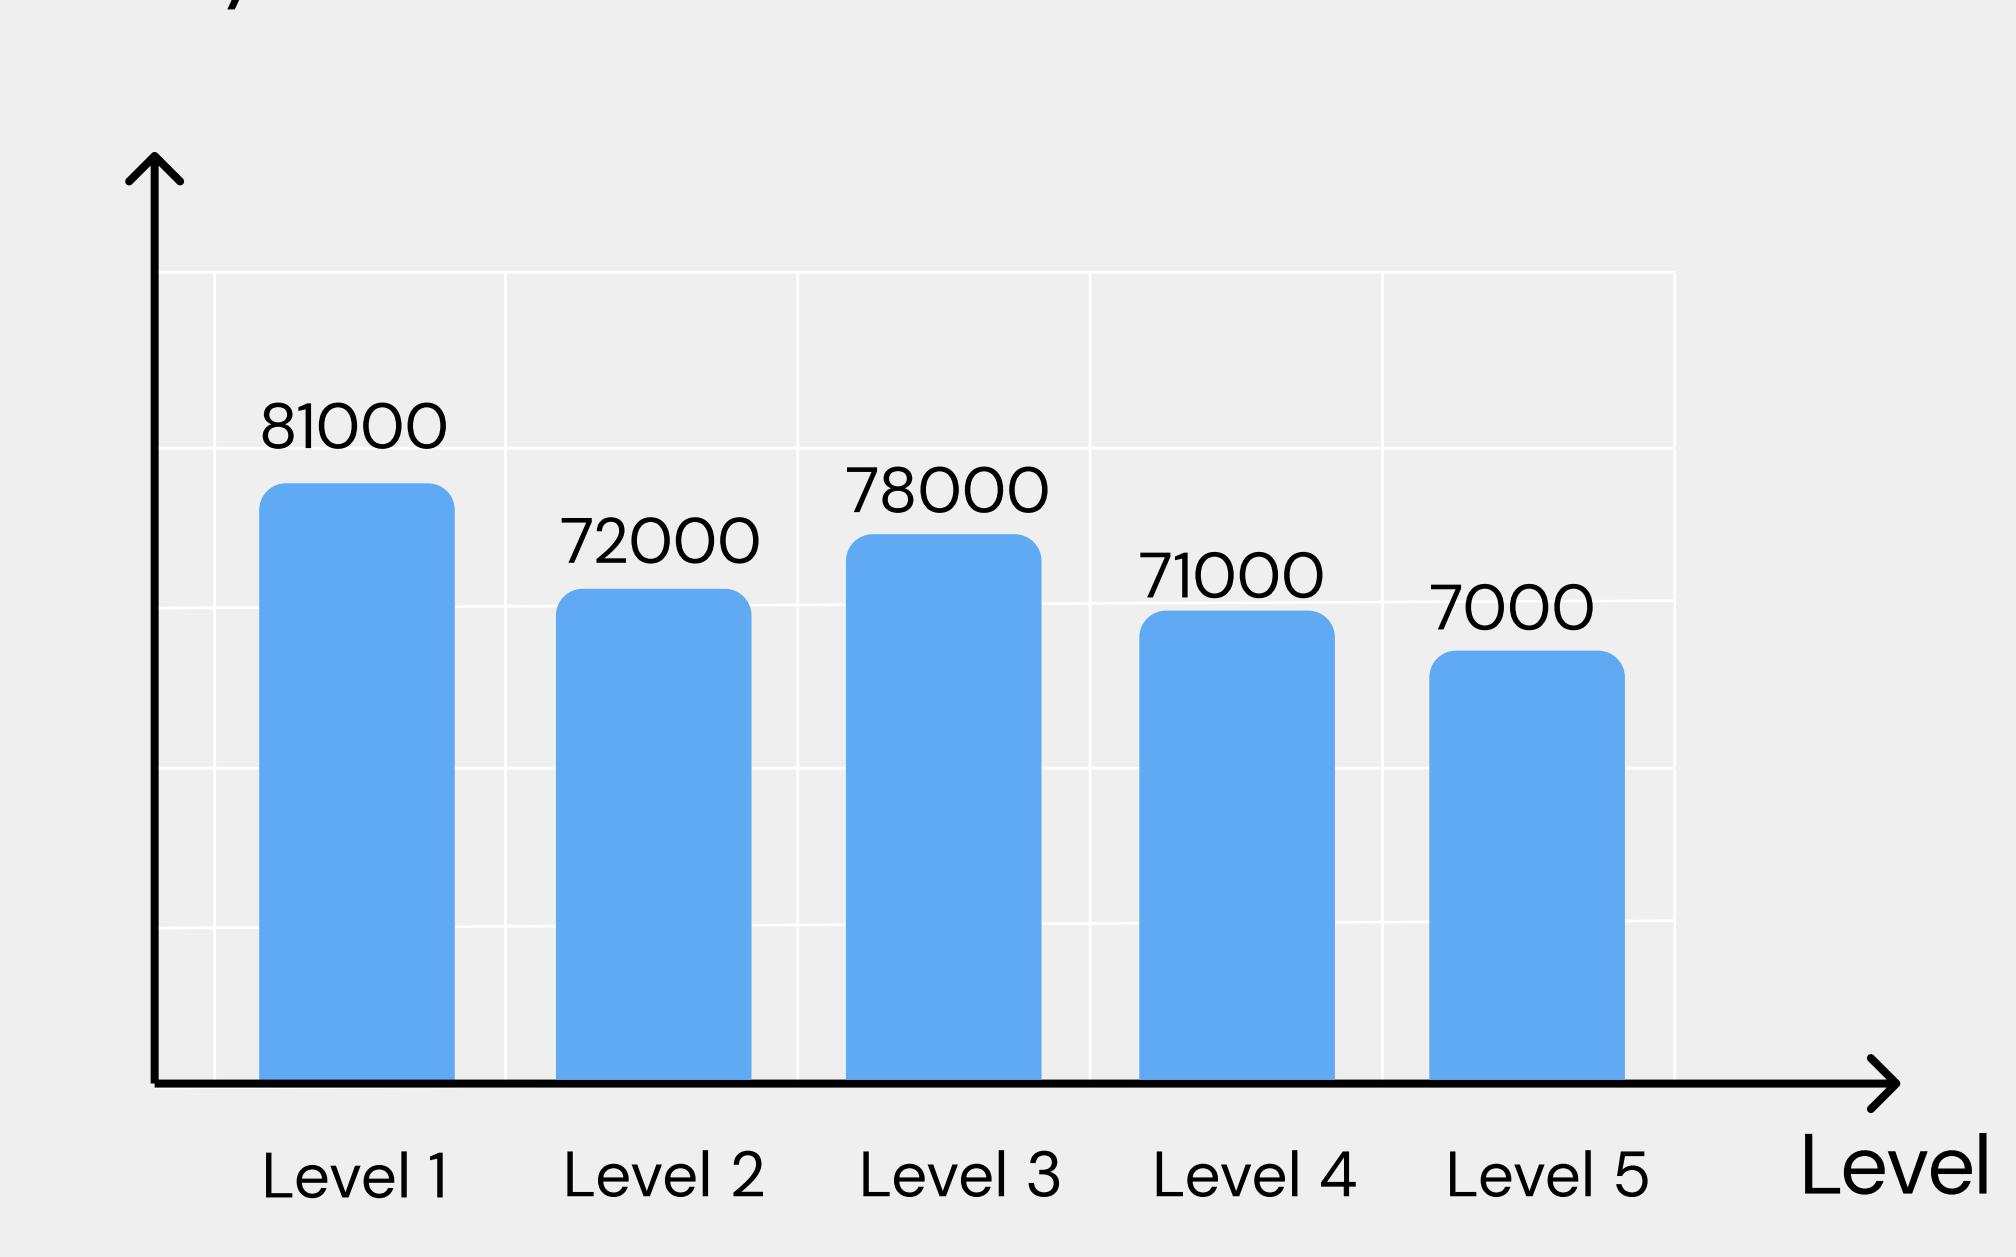

## WHAT YOU CAN DO

Service designers are expanding into industries and functions far beyond traditional UX. You're not limited to interfaces—you can shape strategy, product, operations, and customer journeys across sectors.

## FULFILLMENT FIRST

The service design field is still growing, and most professionals are navigating their place within organizations at different maturity levels. Understanding where you stand is the first step to designing your path forward.

## EXPERIENCE = GROWTH

Every year of experience adds not only to your portfolio—but to your personal satisfaction and financial growth. Here's what real service designers are earning and feeling as they grow.

Higher pay doesn't always mean higher fulfillment. Designers working in more mature design cultures report greater happiness—even if the salary isn't the highest.
